...a new Social App to find Like-minded friends

Want to find new social connections or like-minded friends, people who think like you do? We call them your "Soulmates" and DilemmaMatch is the perfect app to help you find them!

Breukelen, Netherlands - September 4th 2015 – The Bright Side of Life today released a new iOS version of their free social app for iOS and Android mobiles. At the request of many users, we've added a new *Translate* function, so you can see each Dilemma in your local language. We have also completely revised the *Add Dilemma* screen, so it is even easier to add and share your own Dilemmas.

*DilemmaMatch* is a social app! It compares your interests and responses to Dilemmas with other users throughout the world. Our unique matching algorithm will find people who think like you and share your interests. Designed to entertain you and find out how you approach life, the *DilemmaMatch* app will find your potential *Soulmates* - and help you get in touch via Social Media.

All users can answer Dilemmas, share their answers with their friends, and connect with potential *Soulmates* via Facebook.

DilemmaMatch now contains many new features. Along with the new Add Dilemma screens, and the super-smart *Translate* feature, you can match your answers with those of your Facebook friends, or the leading Dilemma creators, earn badges, review your answers, add multiple motivations, and *Like* other users' motivations.

Users of the *Premium* version (available as an in-app purchase on iOS and Android) can also **create** their own Dilemmas containing images, audio and movies, helping you to find people who share your thoughts and beliefs.
